The Optimal Line for Clinicians and Patients

The CT port systems are developed with ease of placement and patient comfort in mind. Durability meets comfort in the hybrid port design featuring a lightweight plastic body with a titanium reservoir. Low-profile designs are suitable in smaller patients and allow for multiple placement options in patients with limited vascular access sites.

Features & Benefits

- ▶ Click Connector™ catheter lock provides a secure and reliable connection of the catheter to the port stem
- ▶ Beveled septum ridge minimizes tissue erosion
- ▶ Septum design minimizes flexing and reflux during needle removal
- ▶ Atraumatic tip aids in a smooth insertion
- ▶ Suitable for high pressure CT applications up to 5 mL/sec

T-Port and T-Port Low Profile

- Ideal for continuous infusion therapy
- Titanium material ensures stability and durability

Tita Jet® Light II, Tita Jet® Light Low Profile & Jet Port® Plus II

- Low-profile design is optimal for discreet placement in compact or peripheral locations
- Tapered nose design created to fit tightly in a minimal pocket for maximum stability
- Tita Jet hybrid ports offer the benefit of titanium during needle insertion and the patient comfort of plastic

Tita Jet Light & Jet Port Dual Ports

- Ideal for administering more than one therapy simultaneously
- Prevents single lumen contamination of incompatible medications

Kit Components

- ▶ 1 Port with CT marking
- ▶ 1 Catheter with atraumatic tip
- ▶ 2 Click Connector™ catheter locks
- ▶ 1 Introducer kit (peel-away-sheath with dilator, .035" guide wire with J tip, introducer needle)
- ▶ 1 Tunneler
- ▶ 2 Jet-Can straight Huber needles (22G, 25 mm)
- ▶ 1 Blunt flushing cannula
- ▶ 1 Syringe (10 mL); 2 Syringes with Dual Port
- ▶ 1 Vein pick
- ▶ Patient identification (bracelet, patient ID card, pendant for key ring)

Ordering Information

Tita Jet Light II High Pressure

Reference Number	Description	Suture Holes
616.368.3077-HA	Plastic body & titanium reservoir with 6.6F clinician attachable catheter	Filled
616.368.2087-HA	Plastic body & titanium reservoir with 8F clinician attachable catheter	Filled

Jet Port Plus II High Pressure

Reference Number	Description	Suture Holes
616.367.3077-HA	Plastic body with 6.6F clinician attachable catheter	Filled
616.367.2087-HA	Plastic body with 8F clinician attachable catheter	Filled

Tita Jet Light Dual and Jet Port Dual High Pressure

Reference Number	Description	Suture Holes
616.021.0078-HA	Plastic body with 9.6F clinician attachable catheter	Filled
616.022.0078-HA	Plastic body & titanium reservoir with 9.6F clinician attachable catheter	Filled

Tita Jet Light Low Profile High Pressure

Reference Number	Description	Suture Holes
616.360.9070-HA	Plastic body & titanium reservoir with 4.8F clinician attachable catheter	Non-filled
616.360.8070-HA	Plastic body & titanium reservoir with 6.6F clinician attachable catheter	Non-filled

T-Port High Pressure

Reference Number	Description	Suture Holes
616.365.3078-HA	Titanium body with 6.6F clinician attachable catheter	Filled
616.365.2087-HA	Titanium body with 8F clinician attachable catheter	Non-filled
616.365.2088-HA	Titanium body with 8F clinician attachable catheter	Filled

T-Port Low Profile High Pressure
